

Week04 – dual linear programming

George McNinch

2024-02-05

For a given linear program \mathcal{L} , we are going to consider this week its so-called *dual linear program* \mathcal{L}' , and related notions like *dual prices* and *slackness*.

First, we'll finish our discussions of the *network flow* construction of linear programs (the network-flow point of view might be useful when you work - next week - on your first midterm report).

- [\[problem set 3\]](#) [\[pdf\]](#) (due 2024-02-09)
 - **Network flows** (from last week) [\[via colab\]](#) [\[download notebook\]](#) [\[pdf\]](#)
 - **dual linear programs** [\[via colab\]](#) [\[download notebook\]](#) [\[pdf\]](#)
 - **dual prices** [\[via colab\]](#) [\[download notebook\]](#) [\[pdf\]](#)
