# Week03 – linear programming

### George McNinch

### 2024-01-29

In week 3, we will have a bit more discussion about root-finding (since our discussion last week was a bit hurried). Then we will begin discussion *linear programming*.

The homework assignment due on `gradescope` on Friday 2024-02-02 is:

- **[problem set 2] [pdf]**
- **[problem set 2 solutions]**

Here are the `jupyter notebooks` for this week:

- **root finding comments** [via colab] [download notebook] [pdf]
- **Linear programs and optimization** [via colab] [download notebook] [pdf]
- **Network flows** [via colab] [download notebook] [pdf]
