Course overview Math087 Math Modeling Spring 2024

George McNinch

2023-10-23

The first is Math 087 *Mathematical Modeling*.

As some practical information, for code use I'll mostly use *python* together with various scientific computing libraries (numpy, scipy, pandas, …), and I plan to use *jupyter notebooks* both in the lectures and for course notes. There are some more details in the course description (the link above).
